Job Description

- Professional Services Consultants find solutions to ensure enterprise deployments make the deepest impact possible across an organisation.
- Our consultants solve organisation's most challenging problems, including the ones they didn't know existed. They are self-motivated, have an insatiable thirst to learn new technologies and thrive in a fast-paced environment.
- Successful RiverSafe security consultants feel comfortable mastering new technologies and come from a variety of business, analytic and technology backgrounds.
- RiverSafe is an incredibly innovative consultancy with a range of offerings which delivers fast time to value for Security, Big Data Analytics, and Operational Intelligence use cases.

+44 (0) 203 633 2577   professional@riversafe.co.uk   www.riversafe.co.uk

Registered Address: Westgate House, 87 St. Dunstans Street, Canterbury, Kent, CT2 8AE
Company no: 06715188 VAT no: 132275045.

Responsibility

The consultant will:

- Drive complex deployments of RiverSafe technology portfolio while working side by side with the customers to solve their unique problems across a variety of use cases
- Collaborate across the entire RiverSafe organization to bring access to product and technical teams, to get the right solution delivered and drive feature innovation gathered from customer input
- Leverage previous experiences, share best practices and create innovative solutions to push user adoption and maximize the value of RiverSafe service offerings
- Enable customers to solve the next wave of questions on their own

Requirements

- Previous experience of working with Splunk, Cisco Sourcefire or other SIEM and IPS/IDS products is a must.
- Practical and theoretical experience in security & big data analytics. Recent experience working with large customers and managing enterprise software deployment projects.
- Experience with both the Unix and Windows operating systems; must be very comfortable on the command line interface.
- Excellent networking fundamentals.
- Experience with scripting and application development (including at least one of Python, Perl, shell scripting, regular expressions, SQL and HTML/JavaScript).

Skills

- Solid communication skills and expertise to translate technical jargon into business familiar language.
- Ability to quickly explore, examine and understand complex problems and how these relate to the customer's business.
- Able to quickly understand and interpret customer problems and navigate complex organisations
- Ability to stop to listen and collaborate with technical and non-technical consumers from IT administrators to executive level stakeholders
- Self-motivated and self-educating, yet willing and able to work collaboratively with both customers and fellow RiverSafe consultants
- Well organized with a healthy sense of urgency, able to set; communicate; and meet aggressive deadlines with competing priorities
- Demonstrable understanding of common enterprise applications (especially in the areas of security and finance)
- Ability & flexibility to travel within EMEA up to 75% of time
